Effort Report Form

Each time you work on the homework assignment, please have this form with you and record the time spent (round to nearest 15 minutes) and the activity that you were doing. Place a check or an X in the appropriate column to describe your activites. For example, if you spent 30 minutes thinking about the solution and then 1 hour coding, you would make two entries. The first would be .5 hours of thinking. The second would be 1 hour of coding.

Remember that the information provided on this form will in no way affect your grade and will not be seen by Dr. Hollingsworth. The purpose of this information is to help understand what processes people use, not evaluate them.

Date	Effort (hours)	Reading Serial Code	Thinking/ Planning	Parallelizing the Code	Testing Code	Tuning Parallel Code	Other
[ex] 8/18/03	0.5	X					
[ex] 8/18/03	1		X
