

Parallel and Distributed Data Intensive Computing CMSC 818S

Alan Sussman
September 3, 2002

The course

- Web pages on CS site
 - www.cs.umd.edu/class/fall2002/cmssc818s

Project

- 1 graded project for the course
 - Implement an application with DataCutter software
 - With another student
 - DataCutter supported by Christian Hansen (chansen@cs)
 - On red/blue Linux cluster in UMIACS – accounts will be given out as needed, later
 - Start in a few weeks
 - First a proposal – including what the dataset(s) will be
 - Then an interim progress report
 - Then final report/demo
- Would it help to implement a simple parallel app first on the cluster?

Other items for today

- Out of town next 2 Tuesdays ...
 - At least one will be covered by someone else
- SC2002
 - Need help with tutorials preparation in October
 - Free access to exhibit floor
