CMSC 132:
Object-Oriented Programming II

Course Introduction

Department of Computer Science
University of Maryland, College Park
Course Catalog Description

- Introduction to use of computers to solve problems using software engineering principles
- Design, build, test, and debug medium-size software systems. Learn to use relevant tools
- Use object-oriented methods to create effective and efficient problem solutions
- Use and implement application programming interfaces (APIs)
- Programming done in Java
Things You Will Learn

- Object-oriented software development
  - Modern software development techniques
  - Object-oriented design

- Algorithms & data structures
  - Lists, trees, graphs

- Programming skills
  - Java API, IDE, testing, debugging
Why Object-Oriented Programming?

- Coding is small part of software development

Estimated % of time

- 35% Specification, design
- 20% Coding, debugging
- 30% Testing, reviewing, fixing
- 15% Documentation, support

Object-oriented approach makes other parts of software development easier
Course Is Not Just About Java

May seem to focus on Java
- All programming in Java
- Many interesting Java language features

Lessons intended to be general
- Principles should apply to all languages
  - Ways of thinking about design
  - General ideas about software
- Can translate skills to other languages
Assume You Already Know

Coding
- Variables, operators, loops, arrays

Basic object-oriented programming
- Classes, methods, inheritance

Java
- Class libraries, exceptions

Tools
- Eclipse IDE, debugger
Where does 132 fit in?

- **CMSC 131**
  - Basic programming skills

- **CMSC 132**
  - Software design & basic algorithms

- **CMSC 212**
  - Low-level programming

- **CMSC 250**
  - Discrete math & logic

- **CMSC 351**
  - Analysis of algorithms
Organization

Personnel
- Instructors
  - Nelson Padua-Perez
  - Chau-Wen Tseng
- Teaching assistants
  - Fatih, Liping, Saket, Adam, Eric, Nick, Jonathan

Classes
- Lectures
- Labs
- Office hours
Textbook

Recommended

“Objects, Abstractions, Data Structures and Design Using Java (version 5.0)”

By Elliot Koffman and Paul Wolfgang
Recommended

“Java Precisely (2nd Edition)”
By Peter Sestoft
Projects

- 8 projects
  - Evaluate design, coding, testing skills
  - Tries to involve interesting application areas
    - Networking, user interfaces, data compression

- Late policy
  - Projects due at 6 pm
  - 20% penalty, up to 9am the next morning
  - Plan to complete all projects on time

- Good faith attempt
  - Must attempt all projects to pass
Projects (cont.)

- **Environment**
  - Eclipse IDE

- **Automated submission & testing**
  - Submit server
    - https://submit.cs.umd.edu
  - Maintains record of submissions
  - CVS repository
  - May use for research
  - Release testing
    - Can evaluate project using real test cases
Grading

Based on

- Projects, homework exercises, quizzes, midterms, final

Point distribution (roughly)

- 40% Projects
- 6% Homework Exercises
- 14% Quizzes
- 10% Midterm #1
- 10% Midterm #2
- 20% Final Exam

Available on-line

- https://grades.cs.umd.edu
Course Bulletin Board

Bulletin Board (Forum)

Policy on project postings
- Can ask about specification, setup, tools, etc.
- Do not ask about design, implementation, etc.
- Violators may face penalty for academic dishonesty
Academic Honesty

- All individual assignments & exams must be done individually (except "open" assignments)
- Do not copy (or allow others to copy) your work in any way
- Submissions will be compared to submissions from current and previous semesters
- Cases of academic dishonesty will be referred to the University's Office of Judicial Programs
- Visit Student Honor Council website for more detailed explanation of academic dishonesty
**Excused Absences**

- Students must apply in writing and furnish documentary support for excused absences.
- Support should explicitly indicate the dates or times the student was incapacitated.
- Excused absence does not typically translate into project extensions.
- Students requesting reasonable academic accommodations due to a disability must provide a letter from the Office of Disability Support Services.
Course Advice

- Start projects early
- Ask questions
- Read book
- Attend lectures
- Attend labs
- Attend office hours
Topics Preview

- Algorithms & data structures
  - Asymptotic efficiency
  - Lists, stacks, queues
  - Trees, tries, heaps
  - Sets, maps, graphs
  - Recursion
Topics Preview

Object-oriented software development

- Software life cycle
- Requirements & specifications
- Designing objects & classes
- Testing & code coverage
- Unified Modeling Language (UML)
- Programming paradigms
- Design patterns
Topics Preview

Programming skills

- Java collection framework
- Exceptions
- Threads, synchronization

Java APIs

- Networking
- Graphics User Interfaces (GUI)
