CURRENT OPENINGS AT TRUSANT TECHNOLOGIES

Position:  Web Development/Database Internship

ELIGIBILITY FOR SECURITY CLEARANCE REQUIRED-(US CITIZENSHIP REQUIRED)

This is a part-time internship position:
Intern will continue development, testing, and training on an internal web-based database application. The purpose of the application is to facilitate the document workflow during the recruiting, evaluation, and hiring process. Intern will work individually in close coordination with Human Resources personnel to determine workflow activities, modify existing system framework, and continue implementation of web GUI front-end and database back-end. Web GUI front-end uses ASP (3.0), CSS, and JavaScript. Database back-end uses SQL Server 2000. Experience with ADODB/ODBC is a plus.

Company description:
Trusant Technologies, LLC is a Service Disabled Veteran Owned Small Business focused on providing Information Technology and Engineering Consulting Services to the U.S. Government and commercial industry. With the explosion in the number of web pages and electronic documents, managing those critical "knowledge assets" provides a significant value to most large organizations, but especially to those in regulated environments. In addition, due to the lessons learned from 9/11 and hurricanes such as Katrina, having contingency plans, and alternate hot- and cold-operating sites allow large organizations to continue their mission the day after disaster strikes. Our company provides IT and Engineering Services, and focuses on providing customer solutions in one of the following areas: Enterprise Content Management (ECM) Systems design and implementation, Program Management Office (PMO) Support, and Continuity of Operations (COOP).

Trusant Technologies offers competitive salaries, “big company” benefits, and the opportunity to work on exciting technologies in a rapidly growing company! Come grow with us!
