

Hi:

I hope everything is going well. Over the winter I will be teaching the following courses:

Winter Course: CMSC298D, Introduction to PHP, MySQL, and Apache.

Web Site:

<http://www.cs.umd.edu/class/winter2010/cmsc298d/index.shtml>

Credits: 2

Grading Method: Pass/Fail

The focus of the class is on the projects (no quizzes, no exams) and to have fun with these technologies. This course needs a minimum number of students in order to take place, therefore, if you are interested in taking it, register as soon as possible. If you have any questions, don't hesitate to drop me a line (nelson@cs.umd.edu). The course has as prerequisite cmsc131 or equivalent. Please let your friends know about it.

In addition, over the winter, I will be teaching the following course for non-majors:

CMSC 198J - Introduction to Computer Programming for Non-Majors Using JavaScript.

Web Site: <http://www.cs.umd.edu/class/winter2010/cmsc198j/index.shtml>

Credits: 3

Please let your friends know about it. In the past, Non-majors have used this course to satisfy their programming requirements.

Take care.

Nelson Padua-Perez
