I32 H

Sept 4th
Array Sum exercise

- prefix sum
- Maximum subsegment sum
  - naive solution is to consider all starting and ending positions, compute sum for each, and find max
  - try to code a more efficient solution
For Wednesday

• Read Chapter 3 of Koffman and Wolfgang
  • Classes, inheritance and class hierarchies
• Also, multidimensional arrays and enums
• Alternative:
  • Java Precisely, Sections 8.3, 9.1-9.6, 13, 14
