

Announcements

- Project posted later in the day/evening
- Submission system will be available on Friday

In-Class Discussion

- In-Class discussion (15 minutes)

grades.cs.umd.edu

- How to use grades.cs.umd.edu

Mac Demo

- Options menu for any application is at the top (confusing at first)
- Browser: Safari
- Notice our mouse has only one button but you can install a conventional mouse
- Finding applications using “Finder”
 - File creation possible via option in File submenu
- The “Applications” folder
- Interesting applications
 - Dashboard.app
 - iMovie.app
 - Calculator.app

Mac Demo

- Creating folders
 - Control-Click will show a menu with options among them “New Folder”
- Changing name and getting file information
 - Control-Click will show the “Get Info” option. After selecting this option you can specify the name
 - You can also change the name by clicking once on the file name, waiting, and then clicking again
- Creating copy
 - Control-Click and select “Duplicate”
- Shortcut
 - Control-Click and select “Make Alias”
- How to create a snapshot of the desktop

PC Demo

- How to create zip files using winzip
- How to create a snapshot of the desktop
- How to create files using CutePDF

- Installation
