

# LAIR: Laboratory for Anticipation of Information Requirements

2/19/2009 Status Update

# Focus of Information

- Less focused on current individual information demand
- More focused on anticipating individual's information demand based on their position in social networks

# Design Focus

- Less emphasis on endpoint
- More focus on server

# Context

- Currently exploring options to model context:
  - Resource Description Framework (RDF)
    - Used in semantic web
  - 1<sup>st</sup> order logic
  - Structured Query Language (SQL)
