Quiz #3

- **Return and go over quiz...**

Reviewing “Dynamic Updates”...

- **Example: MoreDynamicUpdates**

Loops that count

Common situation:

I need to repeat something exactly 723 times:

```
var counter = 0;
while (counter < 723) {
    // do something
    counter = counter + 1;
}
```

For Loops

In some situations a for-loop is more convenient:

```
for (var i = 0; i < 723; i = i + 1) {  
    // do something  
}
```

Let's see some variations:
