History of Changes

SUBMISSION WEBSITE AVAILABLE

NOT OPERATIONAL ANYMORE

Help us test the href="http://vastsubmission.cs.uml.edu/" submission website and let us know immediately if you encounter any problem:

- Register your team and tell us which challenge you hope to participate in (so we can recruit enough reviewers)
- Download the answer forms (which gives you the format to use to submit).
- Test the accuracy of your answers to Mini Challenge 2 (social network). You can only try twice, the 3rd is your final submission.

Developing an online submission and reviewing system is a substantial job (and we could not reuse existing systems because of our specific constraints) so please be gentle on us and don't wait for the last minute to submit your entries so we can correct any problem with the website. You can submit your final version when you are really ready.

SMALL REVISION TO TASK DESCRIPTION (GRAND CHALLENGE SECTION)

We clarified our task description for the Grand Challenge: We originally said that we would provide mapping between names and IP addresses but we only provide IDs (1, 2, 3 etc.) instead of names. That information is contained in the table "employeeData.csv" in the M1-Badge and Network Traffic directory.

In your debrief you can only refer to employees by their ID number, example "Employee 2" or "Employee 3". There is no names to use.
