

CMSC435 Software Engineering

Quiz 03

Name:

1. Realistic design flows incorporate both top-down and bottom-up design -

True

2. The first step of the spiral development model is to implement a simple subset of the overall problem - **False**

3. The iterative model tries to evaluate different alternatives based on objectives and constraints - False

4. List different stages of testing.

1. Unit Testing

2. Module Testing

3. Sub-System Testing

4. Acceptance Testing

Points are credited even if testing process like writing test cases/scripts, reporting bugs, fixing them and retesting is mentioned. (Benefit of doubt)
