

CMSC 436 Quiz #0

Jan. 31, 2013

Name: _____

UID: _____

Problem 1

Name the four Android application components and describe each of them briefly.

Solution:

There are the four types of application components:

- Activities: An activity represents a single screen with a user interface.
- Services: A service is a component that runs in the background to perform long-running operations or to perform work for remote processes.
- Content providers: A content provider manages a shared set of application data.
- Broadcast receivers: A broadcast receiver is a component that responds to system-wide broadcast announcements.
