# Author and Credit Index

---

When the page number of an index entry refers to a credit (such as an acknowledgement of a solution or of aid in the preparation of the book), then the page number is in italics. Index entries corresponding to authors indicate the page numbers on which a work of the corresponding author is either cited or appears in the bibliography. A page range for an individual indicates that each page in the range cites a work of the corresponding author, or is part of the bibliography in which case it contains at least one work of the corresponding author.

## A
