Getting Experimental ideas

- Observations
- From other people’s research
- Using theories
Theories

• Types
  – Descriptive
  – Analogical
  – Quantitative

• Properties
  – Account for known data
  – Testable (Popper’s translation: it can be falsified)
  – Predictive
  – Not too restrictive
Reading for next class

• Doing Psychology Experiments
  – Ch 4, 5
    • Be prepared to explain how these ideas can be applied to your project
  – Study the following web site:
    • http://www.prisonexp.org
