Graduate School in Computer Science

Why, How and What

Alan Sussman

October 2005
The goal

- Why would you want to be a CS grad student?
- How do you go about becoming a CS grad student?
- What’s it like to be a CS grad student?
  - from both a faculty and current grad student perspective
  - what is research?
- Ask *lots* of questions!!!
The agenda

- Heather Murray
  - applications and admissions
  - grad student support from the CS dept.

- David Jacobs
  - why should you get an advanced degree in CS (M.S. or Ph.D.)
  - doing research, emphasizing computer vision and computer graphics

- Atif Memon
  - doing research as an undergrad – why and how
  - doing research, emphasis on software engineering
The agenda (cont.)

- Neil Spring
  - more on why to get an advanced degree
  - doing research, emphasizing systems, especially networks

- Bill Gasarch
  - what admissions committees look for
  - why doing research is good as an undergrad
  - more on picking a grad school

- Michelle Hugue
  - picking a grad school
  - “having a life as a grad student”
The agenda (cont.)

- Graduate student panel:
  John Kleint, Adam Bender, Asad Sayeed
Additional Resources

- Dianne O’Leary’s Grad Student Survival Guide
  - also linked off CS dept. home page, under Graduate Program link

- Tips on writing a statement of purpose
Additional Resources

- Michelle Hugue on grad school

- These slides, and other slide presentations today (and last 2 years), available off my home page – [http://www.cs.umd.edu/~als](http://www.cs.umd.edu/~als)
