

Announcements

- **Today is the last day to withdraw from a course (with a 'W')**
- **Bring laptops on Wednesday**
- **Project #4 due on Thursday**
- **Quiz on Friday**

Text Box: Responding to “Enter” Keystroke

Optional attribute: `onchange`

```
<input type="text"  
      onchange="doSomething()" />
```

Example: NoButtons.html

Multi-Line Text Boxes

- Editable box for large quantity of text
- Typically used to get text input from user

```
<textarea rows="20"
  cols="50">
```

```
</textarea>
```

Example: [HugeTextBox.html](#)

Enter your feedback here.

Checkboxes

- User will either check or not check the box
- Typically used for simple yes/no questions

```
<input type="checkbox" />
```

Example: Checkboxes.html

Radio Buttons

- User will select **ONE** item from several choices
- Selecting one item automatically deselects the other one
- Radio buttons that must cooperate together must all be given the same name attribute

```
<input type="radio" name="colorChoices" /> Red <br />  
<input type="radio" name="colorChoices" /> Green <br />  
<input type="radio" name="colorChoices" /> Blue <br />
```

**Examples: [RadioButtons1.html](#)
[RadioButtons2.html](#)**

Selection Boxes

- User will select an item from several choices
- Multiple-selection box is also possible (see second example)

```
<select id="colorChoices">  
  <option value="red">Red</option>  
  <option value="green">Green</option>  
  <option value="blue">Blue</option>  
</select>
```
