

Announcements

- **Project due tomorrow**
- **Quiz on Friday**
- **Term Paper due on Wednesday next week**

Labels

- Use the `label` tag to apply a text label to a control
- All labels in the form will look consistent
- The label itself is “clickable”
- You can apply CSS rules to all labels simultaneously

Left side label:

```
<label>Name: <input type="text" /></label>
```

Name:

Right side label:

```
<label><input type="text" />Name</label>
```

Name

Example: Labels.html
