

Week 2 - Logic Gates and Boolean Logic

1 ELMS

Now that we're getting underway, make sure you're all set to continue for week 2. Specifically, make sure that you can access ELMS for this class.

2 Review Logic Gates

This week, we focus on getting some concepts reviewed from 250. We'll be looking a lot at logic gates and boolean logic, so make sure to watch the webcast should you want a quick review on **why** we're going over these topics, and check out the appropriate reading on the online textbook if you need a refresher on the actual conceptual knowledge.

3 Setup and Installation

Ensure that you have completed the setup and installation required for the class using the resources provided online. Also, be aware the the instructors are available at the set times they outlined in lecture, and by appointment, should you need further assistance setting up 389E for the class. Please contact the instructors on Discord should you need anything else.

4 Project 0 Due Monday on ELMS

Ensure that you're turning in Project 0 on ELMS on Monday! It's the first project of the semester, and you're expected to have setup all done by then.
