CMSC 122 Quiz 4 Worksheet

The 4th quiz for the course will be posted on Wed, Dec 3 and due at **5 PM on Friday Dec 5**. The following list provides additional information about the quiz.

- The quiz will be a **take home quiz** and you need to write the code on the computer. You will write the JavaScript code for an event-driven webpage.
- The quiz will be posted before class on **Wed. Dec 3. We will discuss the quiz on that day in class.**
- You can use your notes and posted example codes to help you.
- **NO SHARING CODE. This is a quiz. Please do not violate our academic integrity rules.**
- You will submit to the submit server. **You must submit before 5 PM on Friday Dec 5**. **There is no late period. If you submit at 5:01 it will be a zero even if your code is correct.**
- **There will be no class on Friday Dec 5 to free up 50 minutes for everyone to complete the quiz.** Just make sure you have a submission **before 5 PM on Friday Dec 5**.
- Regarding Piazza - Feel free to post questions in Piazza regarding clarification on the quiz, but no code. The TAs and I cannot help you develop the code or debug your code, so please don't go to TA office hours asking them to debug your code. It is a quiz, not a project.
- To prepare for this quiz, I would recommend you look over all the Event-driven code examples so you can easily locate what you need for the quiz.
