Quiz #6

Wed., Mar. 1, 2006

Write all answers legibly in the space provided. The number of points possible for each question is indicated in square brackets – the total number of points on the quiz is 30, and you will have exactly 15 minutes to complete this quiz. You may not use calculators, textbooks or any other aids during this quiz.

1. [24 pnts.] Disprove by counter example or Prove each of the following:

a. The sum of any rational number with any integer is a rational number.

b. For all integers n , if n is odd then n^2 is odd.

c. For all integers n and m , $(n + m) > m$.

2. [6 pnts.] State Yes or No for each of the following (no justification for your answer is necessary). Assume a , b and c are integers and x , y and z are rationals for all of the following questions.

a. _____ If a , b , and c are even, $\frac{a+b+c}{2}$ is also even.

b. _____ $x + y \leq x \cdot y$

c. _____ If $a > b$ and $x > y$, then $a \cdot x > b \cdot y$
