

Announcements

- Make sure you read the class announcements daily

Page Layouts (2-Column)

- When designing your pages it will help you to set borders
- Notice how block elements (e.g., div) float around each other.
- **Example:** twoColumnPageLayoutA.html,
twoColumnPageLayoutA.css
- Adding header and footer
- Notice how to generate line divisions
- **Example:** twoColumnPageLayoutB.html,
twoColumnPageLayoutB.css

Page Layouts (3-Column)

- Define the width of columns using %
- The total percentage should add to a 100
- Make each column float to left
- **Example:** threeColumnPageLayoutA.html,
threeColumnPageLayoutA.css

clear Property

- Determines how a box is placed after a floated box.
- Possible values
 - left – clears left-floated elements; the box is placed underneath
 - right – clears right-floated elements; the box is placed underneath
 - both – clears all floated elements; the box is placed underneath
 - none – elements are not clear
- **Example:** threeColumnPageLayoutA.html,
threeColumnPageLayoutA.css

Alternate Style Sheets

- You can have alternate style sheets that are accessible via the browser
- Example: stylesheetsAlt.html, stylesheetsAltA.css, stylesheetAltB.css

Some Special Effects

- Removing underline from links
 - ❑ **Example:** links.html, links.css (example1)
- Rollover effects for links
 - ❑ **Example:** links.html, links.css
- Highlighting a table row

```
tr:hover {  
    background: red;  
}
```

StoryBoards

- What are they?
- Why you want to use them?
