

Homework assignments will be submitted onto the submit server available at submit.cs.umd.edu. Your login to the submit server will be your University of Maryland [Directory ID](#), not your CS department login. The submit server is simply being used to centrally track your homeworks; we are not providing any public tests on the server.

Before your first submission, you should see a screen similar to below. Click on the link for the appropriate assignment to submit.

CMSC8780 Submit Server

Projects

project	submissions	last submission test results		web submission	Due	Title
		Public	Release			
01	submit				12 Feb, 11:59 PM	Homework 1

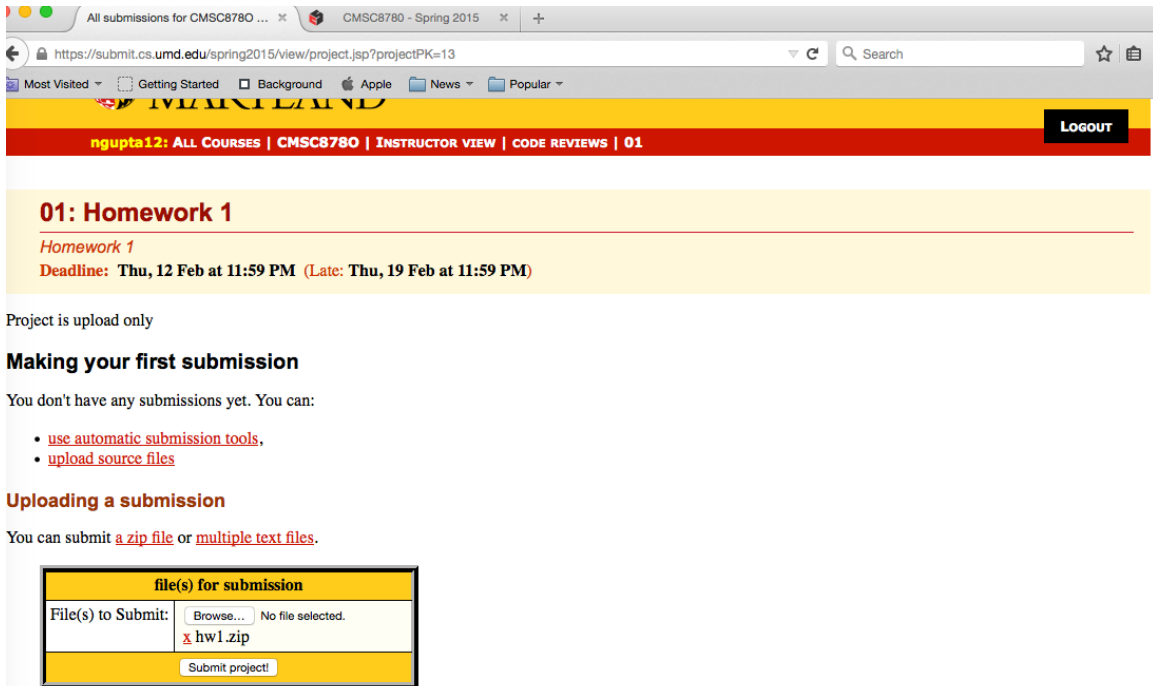

Feeds

- [Course calendar link](#) (iCalendar .ics format: subscribe in iCal, Google calendar, Outlook)

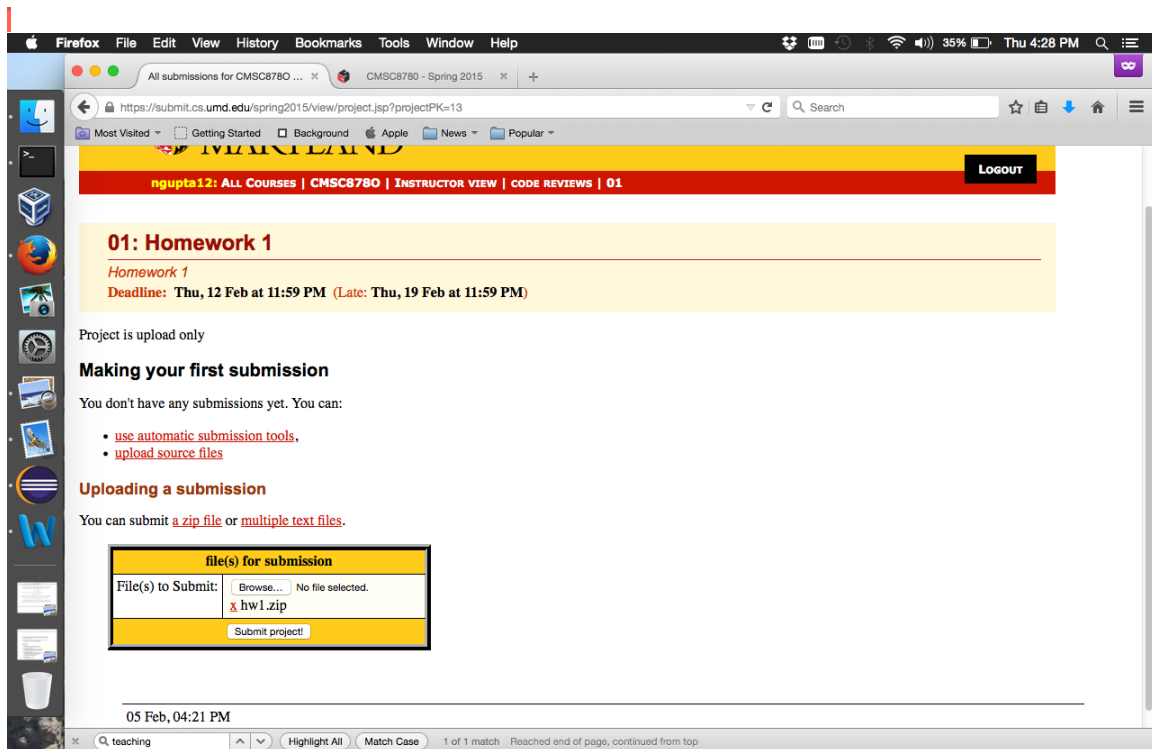

05 Feb, 04:07 PM

After you click on the appropriate assignment, you should upload a Zip file of your homework (or alternatively individually upload each source file). Click the Browse button and select the appropriate file to upload.

When you have uploaded the file successfully, it will appear below. If you uploaded the wrong file, click the red “x” to remove it.

After you submit the assignment, you will see the time of the submission. We will grade the last submission before the deadline (or late deadline), unless you let us know otherwise, though all submissions are logged. Note that you can re-upload an earlier submission, which may reduce potential confusion.

01: Homework 1

Homework 1

Deadline: Thu, 12 Feb at 11:59 PM (Late: Thu, 19 Feb at 11:59 PM)

Project is upload only

Submissions

#	submitted	submission	
		Details	Download
1	Thu, 05 Feb at 04:24 PM	view	download

Making another submission

- [use automatic submission tools](#),
- [edit and submit code in the browser](#) (discouraged)
- [upload source files](#)

Uploading a submission

You can submit [a zip file](#) or [multiple text files](#).

When the submission is successful, you should see ACCEPTED in the Public / Release test boxes. Again, we don't test on the submit server, so they don't indicate whether your code works; they merely indicate we received it.
