CMSC425 Spring 2019
Final project update
Assigned Tuesday, April 23rd
Due by Monday, April 29th
Submit PDF on Elms (no paper required)

This assignment is to check in the progress of your final projects, identify any issues that you may need help with, and to make sure we have the names of all members of each group so we can set up Elms group assignments for grading. Some of this repeats what you submitted with the original proposal – this is just a chance to verify that. Grading will be pass/fail for a few points.

Please submit by Monday one page with:

1. Game title

2. Game members

3. Game description. Has the game evolved? Any significant changes from your original proposal?

4. Where are you in building the game?

5. Are you finding the assets you need to build the game as you want? Answer could be no…

6. Any difficulties or issues you need help with? Answer could be no…
