Recording in Progress

This class is being recorded
Please turn off your video and/or video if you do not wish to be recorded
CMSC436: Programming Handheld Systems
Multimedia
Today’s Topics

Multimedia Support Classes
Playing Audio
Watching Video
Recording Audio
Multimedia

Android provides support for encoding and decoding a variety of common media formats
Allows you to play & record audio, still images & video
Some Multimedia Classes

AudioManager & SoundPool
RingtoneManager & Ringtone
MediaPlayer
MediaRecorder
AudioManager

Manages volume, system sound effects, and ringer mode control

Acquire AudioManager instance via

    Context.getSystemService(Context.AUDIO_SERVICE)
AudioManager

Load & play sound effects
Manage volume
Manage peripherals
SoundPool

 Represents a collection of audio samples (streams)
 Can mix and play multiple simultaneously
AudioVideoAudioManager

Presents two buttons that adjust the volume up or down

Presents a play button that, when pressed, plays a bubble popping sound at the current volume level
Ringtone and RingtoneManager

RingtoneManager provides access to

Audio clips used for incoming phone calls, notifications, alarms, etc.

Allows applications to get and set ringtones and to play and stop playing them
AudioVideoRingtoneManager

Application presents three buttons labeled ringtone, notification and alarm

Pressing one of these buttons causes the associated default ringtone to play
MediaPlayer

Controls playback of audio and video streams and files

Allows applications to control playback

Operates according to a complex state machine

See: http://developer.android.com/reference/android/media/MediaPlayer.html
Some MediaPlayer Methods

setDataSource()
prepare()
start()
pause()
seekTo()
stop()
release()
VideoView

SurfaceView for displaying video files
Can load video from multiple sources
Provides various display options & convenience functions
AudioVideoVideoPlay

Application plays a movie in a VideoView
AudioVideo
VideoPlay
public void onCreate(Bundle savedInstanceState) {
    ...
    // Get a reference to the VideoView
    mVideoView = findViewById(R.id.videoViewer);

    // Add a Media controller to allow forward/reverse/pause/resume
    final MediaController mMediaController =
        new MediaController(AudioVideoVideoPlayActivity.this, true);
    mMediaController.setEnabled(false);
    mVideoView.setMediaController(mMediaController);

    mVideoView.setVideoURI(Uri.parse("android.resource://" +
        getPackageName() + "/raw/moon"));
    ...
}
...  

// Add an OnPreparedListener to enable the MediaController once the video is ready
mVideoView.setOnPreparedListener(new OnPreparedListener() {
    public void onPrepared(MediaPlayer mp) {
        mMediaController.setEnabled(true);
    }
});

// Clean up and release resources
protected void onPause() {
    if (mVideoView != null && mVideoView.isPlaying()) {
        mVideoView.stopPlayback();
        mVideoView = null;
    }
    super.onPause();
}
}
MediaRecorder

Used to record audio and video
Operates in accordance to a state machine
See:
Some MediaRecorder Methods

setAudioSource()
setVideoSource()
setOutputFormat()
prepare()
start()
stop()
release()
AudioVideoAudioRecording

Can record audio from the user
Can play back recorded audio
Note: Audio recording does not work in the emulator
AudioVideo
AudioRecording
private void startRecording() {

    mRecorder = new MediaRecorder();
    mRecorder.setAudioSource(MediaRecorder.AudioSource.MIC);
    mRecorder.setOutputFormat(MediaRecorder.OutputFormat.THREE_GPP);
    mRecorder.setOutputFile(mFileName);
    mRecorder.setAudioEncoder(MediaRecorder.AudioEncoder.AMR_NB);

    try {
        mRecorder.prepare();
    } catch (IOException e) {
        Log.e(TAG, "Couldn't prepare and start MediaRecorder");
    }

    mRecorder.start();
}
// Playback audio using MediaPlayer

private void startPlaying() {
    mPlayer = new MediaPlayer();
    mPlayer.setOnCompletionListener(new MediaPlayer.OnCompletionListener()
        public void onCompletion(MediaPlayer mp) {
            mPlayButton.performClick();
            mPlayButton.setChecked(false);
        });
