

CMSC388N:

Build It, Break It, Fix It: Competing to Secure Software

Lecture 5 - In-class build time

Prof. Daniel Votipka
Winter 2020

COMPUTER SCIENCE
UNIVERSITY OF MARYLAND

The Plan

- Administrivia
- In-class build time!

Administrivia

- Nested if/thens and rules are now optional
 - `if <cond> then <prim_cmd>`
- Make sure **all** your source code is in the build directory along with your **server** executable
- If you're struggling with an error message that you don't see when you run your code locally, please let us know.
- You will receive partial credit for working test cases

In-class Build Time!

- Divide up into teams and spread out
 - You can leave this room, but stay on this floor
 - Send us a message in Slack with where you go
- Instructors will come around to talk
