Traditionally, tactile approaches to maps

Learning maps with a printed tactile Braille atlas

Tactile approaches to maps

Braille mouse gives Braille feedback for different regions

Tactile approaches to maps

Embossed map attached to touchscreen (www.touchgraphics.com)

but

- All require custom input devices or special printed tactile materials
- i.e. not really providing access for all
- Instead, we use what users have:

~~Visualization~~

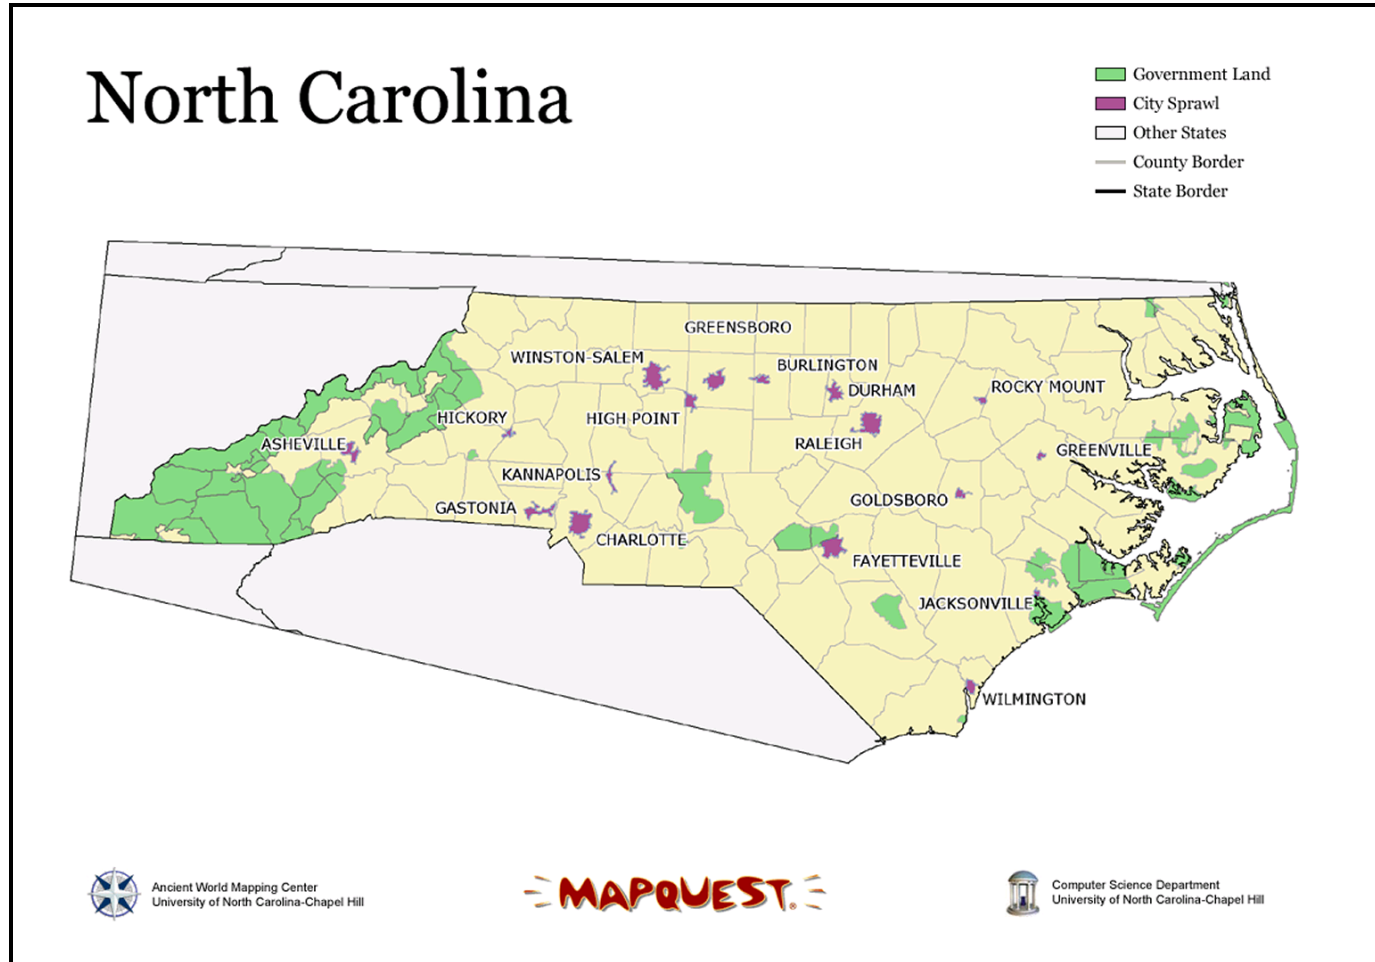

Sonification

Use of non-speech audio to represent data

Still use speech output

Note: other direction is text summarization

Closest related project: Use of “Real world” sounds

BATS project at UNC
Uses open library of spatial sounds as icons

Sonification

- Mono audio
- Stereo audio
- Spatial audio

Left - Right

Up - Down

Front - back

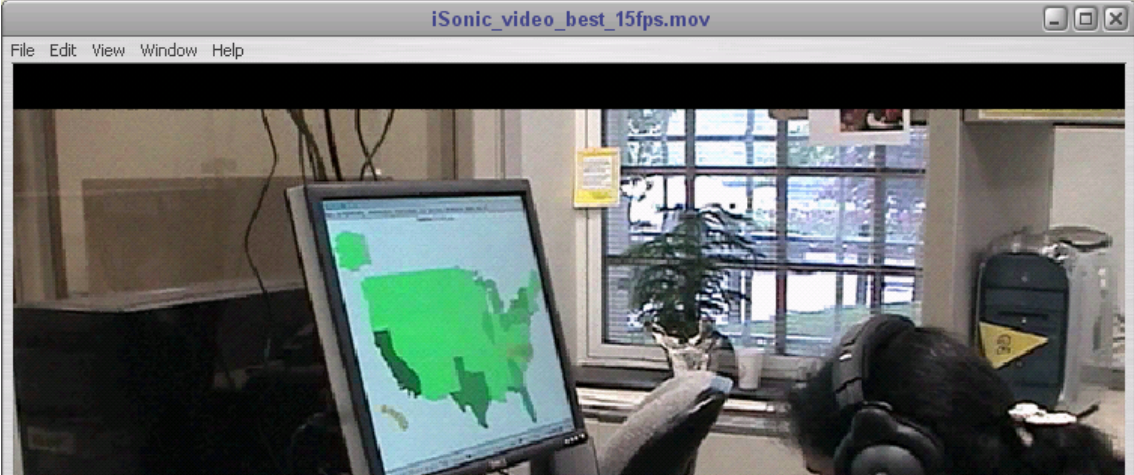

Distance

Sounds generated using high performance dual processors
or by saving very large files of sound libraries

Iterative Process

- First prototype
Pilot study (9 users)
- Second prototype
Controlled experiment (48 users)
of 4 design variations
- Third Prototype: iSonic [Presented here]
- Continuous feedback <- design partners

VIDEO

Evaluation

- 7 participants (no residual vision)
 - Computer users (familiar with excel)
 - Have use of statistics in their work
 - Most had college education
 - Volunteers, paid for their time
-
- Average of 6 hours of observation and interviews, over 2 separate days

7 participants, 42 hours

Sample Tasks

- T1: Name counties with 5 lowest values
- T4: For which factors does County X do better than County Y?

Not really geospacial

- T6: Find all 3 counties that border Frederick. Which one has the highest housing vacancy?
- T7: Among 2 given variables which one increases from east to west?

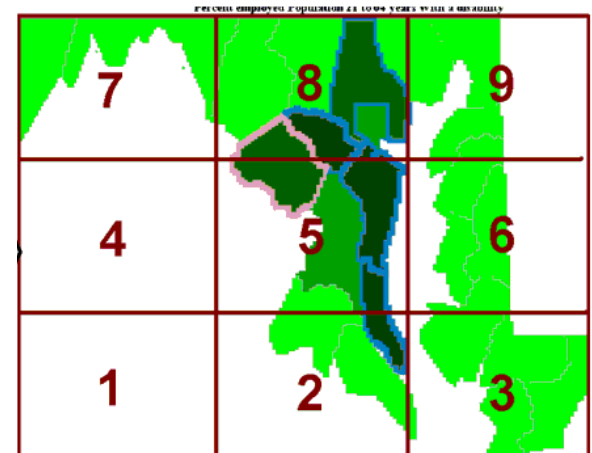

Geospacial

Procedure 1/3: Training

- 1st Day: Training
 - iSonic self paced tutorial (1h 50 min. average)
 - US map, 2003 census data – 8 variables
 - 67% of tasks performed without help

Procedure 1/3: Testing

- 2nd Day
 - Testing with Maryland and its 24 counties
 - Each task with Excel alone, then with iSonic
 - 12 variables
 - NO retraining

Procedure 2/2: Testing

- When no geographical information needed
 - Similar success rate (86%)
 - iSonic preferred over Excel
(7.9 over 7.0 on a 10 pt scale; 10=easiest)
- When geospatial information needed
 - iSonic: 95% success
 - Excel:
 - 67% for 2 users with good knowledge of Maryland
 - 20% for 5 others (who guessed or gave up)

Procedure 2/2: Testing

- When no geographical information needed
 - Similar success rate (86%)
 - iSonic preferred over Excel (7.9 over 7.0 on a 10 pt scale; 10=easiest)

- - Sound/Pitch helpful
 - Sorting easier
 - Isolating regions helpful
 - Different information levels helpful

Maryland
b)

Procedure 2/2: Testing

- When no geographical information needed
 - Similar success rate (86%)
 - iSonic preferred over Excel
(7.9 over 7.0 on a 10 pt scale; 10=easiest)
- When geospatial information needed
 - iSonic: 95% success
 - Excel:
 - 67% for 2 users with good knowledge of Maryland
 - 20% for 5 others (who guessed or gave up)

Procedure 2/2: Testing

- When no geospatial information needed
 - Similar success rates
 - iSonic preferred (7.9 over 7.5)
 - When geospatial information needed
 - iSonic: 95% success
 - Excel:
 - 67% for 2 users with good knowledge of Maryland
 - 20% for 5 others (who guessed or gave up)
- Map easy to use and helpful
 - Switching between table and map
 - Pitch helpful to compare
 - More than one way to find answers

Procedure 2/2: Testing

- When no geospatial information needed
 - Similar success rates
 - iSonic preferred - *More than one way to find answers*
(7.9 over 7.9)
- When geospatial information needed
 - iSonic: 95% success
 - Excel:
 - 67% for 2 users with good knowledge of Maryland
 - 20% for 5 others (who guessed or gave up)

Procedure 1/2: Testing

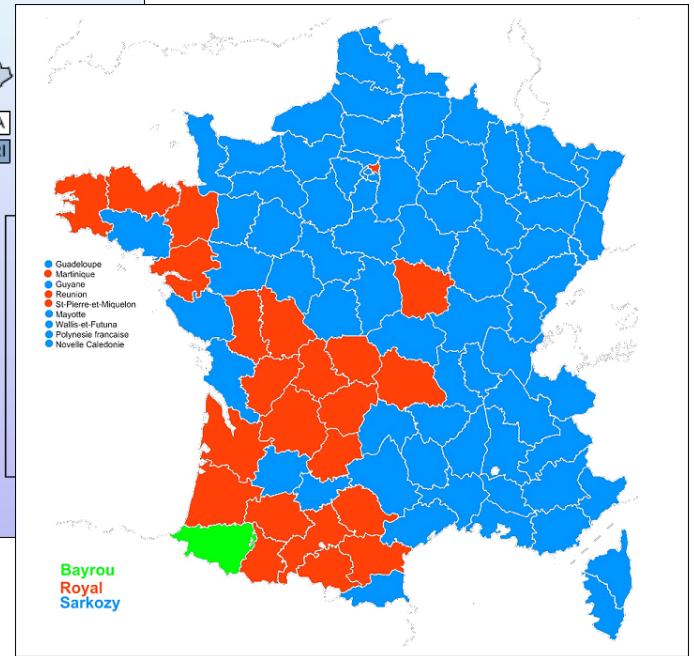

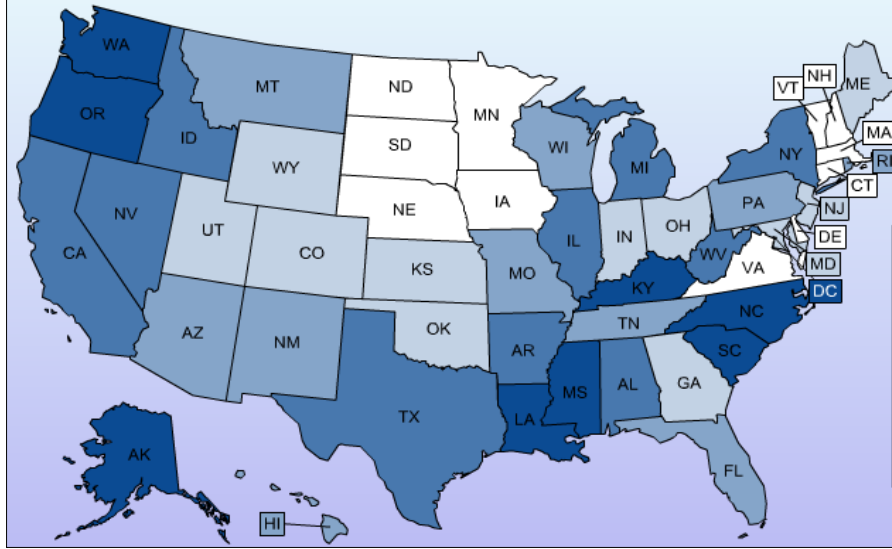

- When no geospatial information needed
 - Similar success
 - iSonic pre
 - (7.9 over 7)

Users did find steps on their own
Exception: correlation (i.e. sorting one column, then listening to other column - with inf. level 1 = only pitch)

- When geospatial information needed
 - iSonic: 95% success
 - Excel:
 - 67% for 2 users with good knowledge of Maryland
 - 20% for 5 others (who guessed or gave up)

- VIDEO AGAIN?

 DEMOCRATS: Lead (light blue), Win (dark blue)
 REPUBLICANS: Lead (light red), Win (dark red)

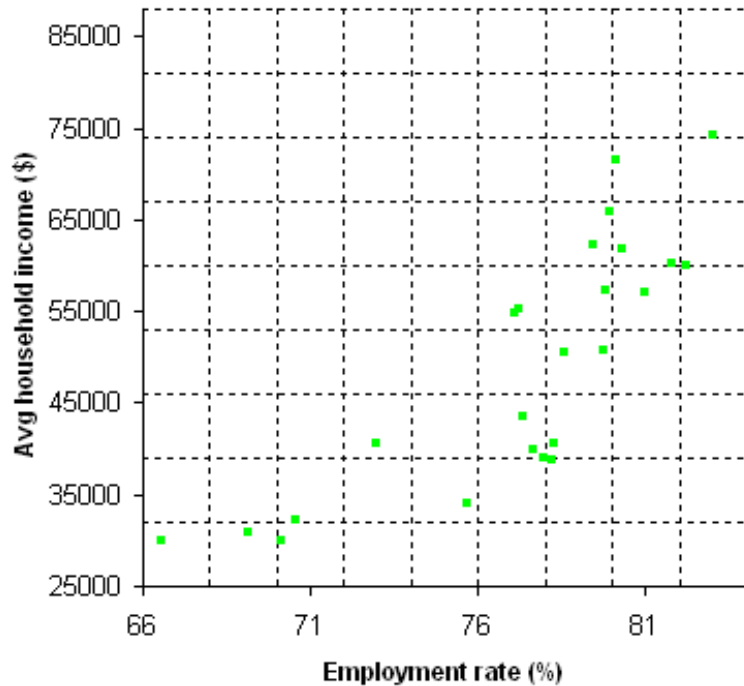

Suggestions

- Provide the data (can be loaded in excel)
- Consider sonification (hard but effective)
- Improve table viewers
- Coordinate map and table
- Navigate with numerical keypad
- Synchronize visual and sound → cooperation

- Use/Expand our toolkit
 - Java webstart
 - Source code, tutorials and extra utilities available for **DOWNLOAD**

and many more excellent ideas...

Procedure 3/3 – Free exploration

- Post test:
 - Free exploration of Idaho (but didn't know) with 44 counties with both iSonic, and asked to report on things of interest
 - Semi-structured interview
