

The Winners For Funniest Moments

May 7, 2026

Ryan's Friend and Bad Sequence

BILL: Since **Bad Sequence** and **Ryan's Friend** were involved in two of the top winners of the **Funniest Moments** contest, they will help me present the winners, and also their own choices.

Ryan's Friend and Bad Sequence

BILL: Since **Bad Sequence** and **Ryan's Friend** were involved in two of the top winners of the **Funniest Moments** contest, they will help me present the winners, and also their own choices.

BAD SEQUENCE: I am honored to be here with **BILL** and **RYAN'S FRIEND**.

Ryan's Friend and Bad Sequence

BILL: If there are n people and each pair is honored—

BAD SEQUENCE: Uh, lets get a move on. I need the **review**. I want to get a good grade for grad school.

RYAN'S FRIEND: How sweet it is to be leaving grad school and not have to worry about my grade in this course!

Ryan's Friend's Favorite

Ryan's Friend's Favorite

RYAN'S FRIEND: The entire course has been funny for me since I am a practical guy and this course is so theoretical. Whenever you've done a construction I had two thoughts:

Ryan's Friend's Favorite

RYAN'S FRIEND: The entire course has been funny for me since I am a practical guy and this course is so theoretical. Whenever you've done a construction I had two thoughts:

Could you code this up?

Ryan's Friend's Favorite

RYAN'S FRIEND: The entire course has been funny for me since I am a practical guy and this course is so theoretical. Whenever you've done a construction I had two thoughts:

Could you code this up?

Would you want to?

Ryan's Friend's Favorite

RYAN'S FRIEND: The entire course has been funny for me since I am a practical guy and this course is so theoretical. Whenever you've done a construction I had two thoughts:

Could you code this up?

Would you want to?

Hence the funniest moments were the times you had the class vote on if something was really an **“application”**.

Bad Sequence's Favorite

Bad Sequence's Favorite

BAD SEQUENCE: I want to say that **BAD SEQUENCE:** singing the infinite hat song was my favorite, but it seems unfair to brag about myself.

Bad Sequence's Favorite

BAD SEQUENCE: I want to say that **BAD SEQUENCE:** singing the infinite hat song was my favorite, but it seems unfair to brag about myself.

BILL: Really?

Bad Sequence's Favorite

BAD SEQUENCE: I want to say that **BAD SEQUENCE:** singing the infinite hat song was my favorite, but it seems unfair to brag about myself.

BILL: Really? I do it all the time.

Bad Sequence's Favorite

BAD SEQUENCE: I want to say that **BAD SEQUENCE:** singing the infinite hat song was my favorite, but it seems unfair to brag about myself.

BILL: Really? I do it all the time.

BAD SEQUENCE: Here's an idea: I'll say the funniest moment was **the lyrics you wrote**, and you'll say the funniest moment is **the song I sung**.

Bad Sequence's Favorite

BILL: Really? I do it all the time.

BAD SEQUENCE: Here's an idea: I'll say the funniest moment was **the lyrics you wrote**, and you'll say the funniest moment is **the song I sung**.

BILL: Deal!

Bad Sequence's Other Funniest Moment

Bad Sequence's Other Funniest Moment

BAD SEQUENCE: I have one more favorite funny moment.

Bad Sequence's Other Funniest Moment

BAD SEQUENCE: I have one more favorite funny moment.

BILL: You can't have two favorite funny moments.

Bad Sequence's Other Funniest Moment

BAD SEQUENCE: I have one more favorite funny moment.

BILL: You can't have two favorite funny moments.

BAD SEQUENCE: So you are saying that in a horse race there can't be any ties, so $H(n) = n!$.

Bad Sequence's Other Funniest Moment

BAD SEQUENCE: I have one more favorite funny moment.

BILL: You can't have two favorite funny moments.

BAD SEQUENCE: So you are saying that in a horse race there can't be any ties, so $H(n) = n!$.

BILL: Point taken. Okay, what is your other favorite funny moment?

Bad Sequence's Other Funniest Moment

BAD SEQUENCE: I have one more favorite funny moment.

BILL: You can't have two favorite funny moments.

BAD SEQUENCE: So you are saying that in a horse race there can't be any ties, so $H(n) = n!$.

BILL: Point taken. Okay, what is your other favorite funny moment?

BAD SEQUENCE: Because of this bickering it has to go on the next slide.

Bad Sequence's Other Funny Moment

BAD SEQUENCE: When you asked us to compare and contrast the **BAD SEQUENCE** version of **I can see for miles and Miles** and **The Who**'s version one of the students said the following:

Bad Sequence's Other Funny Moment

BAD SEQUENCE: When you asked us to compare and contrast the **BAD SEQUENCE** version of **I can see for miles and Miles** and **The Who**'s version one of the students said the following:

3) *All of the members of **The Bad Sequence Band** know Ramsey theory, and one member is an expert.*

Bad Sequence's Other Funny Moment

BAD SEQUENCE: When you asked us to compare and contrast the **BAD SEQUENCE** version of **I can see for miles and Miles** and **The Who**'s version one of the students said the following:

3) *All of the members of **The Bad Sequence Band** know Ramsey theory, and one member is an expert. Megan.*

Bad Sequence's Other Funny Moment

BAD SEQUENCE: When you asked us to compare and contrast the **BAD SEQUENCE** version of **I can see for miles and Miles** and **The Who**'s version one of the students said the following:

3) *All of the members of **The Bad Sequence Band** know Ramsey theory, and one member is an expert. Megan.*
*By contrast, only one member of **The Who** knows Ramsey Theory*

Bad Sequence's Other Funny Moment

BAD SEQUENCE: When you asked us to compare and contrast the **BAD SEQUENCE** version of **I can see for miles and Miles** and **The Who**'s version one of the students said the following:

3) *All of the members of **The Bad Sequence Band** know Ramsey theory, and one member is an expert. Megan.*

*By contrast, only one member of **The Who** knows Ramsey Theory and he only knows it for graphs, not hypergraphs.*

Bad Sequence's Other Funny Moment

BAD SEQUENCE: When you asked us to compare and contrast the **BAD SEQUENCE** version of **I can see for miles and Miles** and **The Who**'s version one of the students said the following:

*3) All of the members of **The Bad Sequence Band** know Ramsey theory, and one member is an expert. Megan.*

*By contrast, only one member of **The Who** knows Ramsey Theory and he only knows it for graphs, not hypergraphs.*

BAD SEQUENCE: The look on Megan's face was adorable!
That was the funniest moments of the class!

The Bolzano Weierstrass Rap and begin introduces to Bill's massive collection of math-novelty songs.

Bill voting on whether something was an **“Application”**.

Of special note wa applying the 4-ary Ramsey Theorem to prove the 2-ary Can Ramsey Theorem.

The Following Moments Got 2 Votes and a Third if you count mine

The Following Moments Got 2 Votes and a Third if you count mine

Erdős & Szekeres proved: $(\forall k)(\exists n)(\forall X \subseteq \mathbb{R}^2, |X| = n)(\exists Y \subseteq X)$
 $|Y| = k$, and the convex hull of Y is a k -gon.

The Following Moments Got 2 Votes and a Third if you count mine

Erdős & Szekeres proved: $(\forall k)(\exists n)(\forall X \subseteq \mathbb{R}^2, |X| = n)(\exists Y \subseteq X)$
 $|Y| = k$, and the convex hull of Y is a k -gon.

Esther was so impressed that she married **Szekeres**.

The Following Moments Got 2 Votes and a Third if you count mine

Erdős & Szekeres proved: $(\forall k)(\exists n)(\forall X \subseteq \mathbb{R}^2, |X| = n)(\exists Y \subseteq X) |Y| = k$, and the convex hull of Y is a k -gon.

Esther was so impressed that she married **Szekeres**.

That is why **Erdős** calls it **The Happy Ending Theorem**.
