Dear William Gasarch:

Thanks for the reviews. I'm honored. I have only a few ^{TRIVIAL} ~~trivial~~ nonmathematical corrections:

P.15, line 6 from bottom. Replace from with in.

P.15, line 4 from bottom. Insert in between then and later.

P.15, line 14 from bottom. Add s to book.

P.16, line 17. Remove the second there is.

I enjoyed the reviews. I must get Ian Stewart's Cabinet of Math Curiosities. I hadn't realized he covered my problem of the order-3 magic "square of squares." I still have a reward for a solutionⁿ or proof of impossibility. (Impossibility has been ^{proved} ~~proved~~ for all higher powers.)

All best,

Martin
