REU-CAAR: You’re Here!
Credit where Credit is Due

Origin of this talk
Origin of this talk

- In 2010 a Univ of MD Cybersecurity REU produced a 20-page document:
  Cybersecurity Scholars Handbook.
Credit where Credit is Due

Origin of this talk

► In 2010 a Univ of MD Cybersecurity REU produced a 20-page document:

   Cybersecurity Scholars Handbook.

► Bill G modified this boring handbook into a fascinating ∼ 280-slide talk!
Credit where Credit is Due

Origin of this talk

▶ In 2010 a Univ of MD Cybersecurity REU produced a 20-page document: 
   Cybersecurity Scholars Handbook.

▶ Bill G modified this boring handbook into a fascinating ∼ 280-slide talk!

Auguste: Why are you telling them all that?
Origin of this talk

- In 2010 a Univ of MD Cybersecurity REU produced a 20-page document:
  
  Cybersecurity Scholars Handbook.

- Bill G modified this boring handbook into a fascinating ∼ 280-slide talk!

Auguste: Why are you telling them all that?
Bill: In academia its very important to credit past work!
Purpose of This Talk

1. Who are the mentors?
2. What are the projects?
3. What is expected of you?
4. What should you expect of us?
5. Nuts and bolts of how the program works.
6. Advice on how to get the most out of this summer!

REU-CAAR: TEAM!
Mentors

1. Verif. of Quantum Simulation: Andrew C, Dhurv D, Alexy G.
2. Security Estimation for Post-Quantum Crypto: Dana DS.
3. Differential Economics: John D and Ian M.
4. Comparing AI to Human Int. with Regard to Bias: Tom G.
5. Ramsey Theory on Ordered Sets: Bill G.
6. Fair Decision, Resource Allocation, Bias: Furong H.
7. Exploring the Hilbert Geometry: Auguste G. and Dave M.

2. Bill G. has been the PI (Principle Investigator) 2013-2024.

3. Samir Khuller was co-PI (co-Principle Investigator). 2013-2019

4. Samir left UMCP, became chair at NW in Spring 2020. John Dickerson has been co-PI 2020-2024.

5. For 2022-23-24 we got additional money for a helper. In 2022 Auguste is that helper. He will
   (1) co-mentor a group, and
   (2) help Bill with some of the admin.

7. We will share some activities with them.
1. Grants are for 3 years. Original grant was 2013-14-15.
1. Grants are for 3 years. Original grant was 2013-14-15. Grant was renewed: 2016-17-18, 2019-20-21, 2022-23-24. Bill G. has been the PI (Principle Investigator) 2013-2024.

2. Samir Khuller was co-PI (co-Principle Investigator). 2013-2019

What the Program Expects of You

1. Show up every weekday.
What the Program Expects of You

1. Show up every weekday. On time and sober. 10AM-4PMM
What the Program Expects of You

1. Show up every weekday. On time and sober. 10AM-4PMM

This is the Wrong Way To Look at the program
What the Program Expects of You

1. Show up every weekday. On time and sober. 10AM-4PM.

This is the Wrong Way To Look at the program

I invite you to talk about jobs you’ve had. I’ll go first.
What the Program Expects of You

1. Show up every weekday. On time and sober. 10AM-4PMM

This is the Wrong Way To Look at the program

I Invite you to talk about jobs you’ve had. I’ll go first.

Upshot
What the Program Expects of You

1. Show up every weekday. On time and sober. 10AM-4PMM

This is the Wrong Way To Look at the program

I Invite you to talk about jobs you’ve had. I’ll go first.

Upshot

1. This program should not be seen as a job where you put in your 8 hours a day and then you’re free to do what you want.
What the Program Expects of You

1. Show up every weekday. On time and sober. 10AM-4PMM

This is the Wrong Way To Look at the program

I Invite you to talk about jobs you’ve had. I’ll go first.

Upshot

1. This program should not be seen as a job where you put in your 8 hours a day and then you’re free to to what you want.

2. You are here because you care about Quantum or AI or ML or Bias or Ramsey Theory or Geometry or Security.
What the Program Expects of You

1. Show up every weekday. On time and sober. 10AM-4PMM

This is the Wrong Way To Look at the program

I Invite you to talk about jobs you’ve had. I’ll go first.

Upshot

1. This program should not be seen as a job where you put in your 8 hours a day and then you’re free to do what you want.

2. You are here because you care about Quantum or AI or ML or Bias or Ramsey Theory or Geometry or Security.

3. So you should want to keep working on your projects, perhaps on a lower level, after you go back to the dorms.
What the Program Expects of You

1. Show up every weekday. On time and sober. 10AM-4PMM

This is the Wrong Way To Look at the program

I Invite you to talk about jobs you’ve had. I’ll go first.

Upshot

1. This program should not be seen as a job where you put in your 8 hours a day and then you’re free to do what you want.

2. You are here because you care about Quantum or AI or ML or Bias or Ramsey Theory or Geometry or Security.

3. So you should want to keep working on your projects, perhaps on a lower level, after you go back to the dorms.

4. Talk to each other in the dorms about your projects!
What the Program Expects of You: Restart

1. **S**how up every weekday.

   1. **P**articipate in assessments such as surveys.
   2. **A**ctively contribute to your research project and your team.
   3. **C**heck e-mail. Reminders, notices, requests will be emailed.
   4. **E**nthusiasm!
   5. **A**ttend lunches, talks, and other activities. (Talks and some activities joint with REU-BRIDGE.)
   6. **G**reat talks: Attend them and at the end of the semester you will give them. (Joint presentation with REU-BRIDGE.)
   7. **E**njoy yourselves!

Acronym: SPACE AGE
What the Program Expects of You: Restart

1. **Show up** every weekday. On time and sober. 10AM-4PM.
What the Program Expects of You: Restart

4. **C**heck e-mail. Reminders, notices, requests will be emailed.

---

The hyphenated `email` is an interesting piece of history. I chose to include it to provide context and show you a unique aspect of the handbook that may not be commonly seen today. It serves as a historical artifact that adds a layer of curiosity to the document.

Issues that Probably Won’t Arise But Need to be Discussed
Sexual Harassment and Discrimination

1. Speak directly to the individual in a respectful manner. This will let you immediately know if the different treatment is a misunderstanding or a major problem.

2. If you feel uncomfortable, seek advice and guidance from others. Bill Gasarch, John Dickerson, or Furong Huang (One of the REU-CAAR mentors) can offer assistance and direct you to campus resources for help. Note that in the United State there is Mandatory Reporting: if a mentor or director hears about a case of sexual harassment, they must report it.

3. While this slide is about Sexual Harassment and Discrimination, feel free to talk to Bill Gasarch, John Dickerson, or Furong Huang about any issue, even if it is uncomfortable.

Do Your Part

Good News That You Know:

1. You get a stipend.
2. You get free room and some meal money.

If you do not do your part you could be asked to leave, which will mean you get less of your stipend. This is RARE! (once in 2014 and once in 2016).

What is 'your part':

Complaints In the Past

Over the last year there was only THREE complaints:
Complaints In the Past

Over the last year there was only THREE complaints:

Being Virtual is a Real Downer

This summer the program is in person!

Talks should be at 4:00 instead of 3:00 so can get more done

Done!

Non Citizens Could not get ID cards and hence had to pay Full Price at the Gym

Mihai Pop of REU-BRIDGE was amazed this was true. I had to remind him that incredibly stupid university rules are not unusual.

Not enough meat pizza on Game Nights

I'll do what I can.

Explore Washington DC On Your Own AND

1. Very few of you are locals. Use cell phones.

Sergey Brin was a UMCP ugrad, so use Google maps.

Weekends you SHOULD visit Washington DC. Goto the Whitehouse and say hello to President Biden. Jill Biden may help you on your project since her s PhD is in Quantum Ramsey Theory. My wife says I must tell you when I am kidding. I am kidding. She (Jill, not my wife) is the first First Lady to have a PhD. It's in education.

Other Things We Will Do

1. Field Trip at Spy Museum (Prob a Monday in July).
2. Lunch where we discuss How to do Bad Science.
3. Lunch where we discuss graduate school (with guests).
4. Game Nights with Pizza!
5. Final presentation the last week.
6. Unexpected things will happen! Always expect the unexpected! (Is that a paradox?)

Summary of Projects and People
Exploring Hilbert Geometry

Computational Geometry asks questions like Given a set of lines find all of the points of intersection. It is assumed they mean lines in the plane or perhaps $\mathbb{R}^n$. What if you are in another space? A curved space? What can you do?

This project!

Students
Madeline Bumpus, Caesar Dai, Samuel Monoz, Renita Santhoshkumar, Songyu Ye.
1. Exploring Hilbert Geometry
Auguste-Dave Geometry Project

1. Exploring Hilbert Geometry
2. Elevator Pitch

Computational Geometry asks questions like Given a set of lines find all of the points of intersection. It is assumed they mean lines in the plane or perhaps $\mathbb{R}^n$. What if you are in another space? A curved space? What can you do? You can do this project!

1. Verification of Quantum Simulation

2. Elevator Pitch

When we have quantum computers we will need to verify that their output is correct. One way to do this is to simulate a quantum computer on a classical device. This project will be about how to do that.

3. Student

Ruozchen Gong

4. Misc

There may be grad Students and one postdoc Zooming in from China.

Dana’s Security Project

1. Concrete Security Estimation for Post-Quantum Cryptosystems with Side Information

2. Elevator Pitch

Today’s crypto systems rely on factoring being a hard problem. Quantum computers can, theoretically, factor very quickly. Hence people are already building post-quantum cryptosystems which means those not based on factoring being hard.

What about non-math attacks like side-channel? Are the new systems secure against those? Let’s find out!

3. Students

Michael Gonzalez, Harikesh Kailad, Alexander Lindenbaum.

Dana’s Security Project

1. **Concrete Security Estimation for Post-Quantum Cryptosystems with Side Information**

2. **Elevator Pitch**
   Today’s crypto systems rely on *factoring* being a hard problem. Quantum computers can, theoretically, factor very quickly. Hence people are already building post-quantum cryptosystems which means those not based on factoring being hard.

   What about non-math attacks like side-channel? Are the new systems secure against those? Let’s find out!

3. **Students** Michael Gonzalez, Harikesh Kailad, Alexander Lindenbaum.
1. Differentiable Economics

How do we divide up goods (e.g., children to schools, organs to patients, muffins) in a fair way? What does fair mean? This project will apply AI/ML to these problems.

3. Students
Davidson Cheng, Yang Hong, Reem Al Marzoa, Abdulaziz Memesh.
1. Differentiable Economics

How do we divide up goods (e.g., children to schools, organs to patients, muffins) in a fair way? What does fair mean? This project will apply AI/ML to these problems.

Students
Davidson Cheng, Yang Hong, Reem Al Marzoa, Abdulaziz Memesh.
John-Ian Diff Eco Project

1. Differentiable Economics
2. Elevator Pitch
1. **Differentiable Economics**

2. **Elevator Pitch**

1. Comparing AI to Human Intelligence with Regard to Bias

2. Elevator Pitch

Humans are biased. AI systems are biased. We want to, of course, combat this for AI systems (for humans also, but that would be a Psychology REU).

In what ways are human bias and AI similar? different? Can we identify the source of AI bias? Correct it? We can try!

3. Students

Maya Murry, Anneke Wernerfelt, Dalal Ahmidouch.
1. **Comparing AI to Human I with Regard to Bias**

Humans are biased. AI systems are biased. We want to, of course, combat this for AI systems (for humans also, but that would be a Psychology REU). In what ways are human bias and AI similar? different? Can we identify the source of AI bias? Correct it? We can try!
1. Comparing AI to Human I with Regard to Bias
2. Elevator Pitch
Tom’s AI-HI Project

1. **Comparing AI to Human I with Regard to Bias**
2. **Elevator Pitch**
   - Humans are biased. AI systems are biased.
1. **Comparing AI to Human I with Regard to Bias**

1. Ramsey Theory on Ordered Sets

2. Elevator Pitch
If you color $\mathbb{N}$ (the natural numbers) \textcolor{red}{RED} and \textcolor{blue}{BLUE} there will be an infinite $A \subseteq \mathbb{N}$ that is all the same color. As an ordered set $A$ looks just like $\mathbb{N}$.

What happens if you color $\mathbb{Z}$ (integers)? $\mathbb{Q}$ (rationals)? $\mathbb{R}$ (reals)? $\mathbb{N} \times \mathbb{N}$? Other sets?

Bill’s Ramsey Project

1. Ramsey Theory on Ordered Sets

2. **Elevator Pitch**
   If you color $\mathbb{N}$ (the natural numbers) **Red** and **Blue** there will be an infinite $A \subseteq \mathbb{N}$ that is all the same color. As an ordered set $A$ looks **just like** $\mathbb{N}$.
   What happens if you color $\mathbb{Z}$ (integers)? $\mathbb{Q}$ (rationals)? $\mathbb{R}$ (reals)? $\mathbb{N} \times \mathbb{N}$? Other sets?
3. **Students** Joanne Boyland, Nathan Hurtig, Robert Rust.
Furong’s Fair Div and Bias

1. Fair Division, Resource Allocation, and Bias

2. Elevator Pitch
At one point it was hoped that automating decisions would decrease human bias. But instead there are times when it inherits human bias.

This project looks at how to deal with that (and reduce bias) in the context of ML/AI for resource allocation.

3. Students
Suhani Agrawal, Justin Huang, Ben Kreiswirth.
1. Fair Division, Resource Allocation, and Bias

At one point it was hoped that automating decisions would decrease human bias. But instead there are times when it inherits human bias. Darn! This project looks at how to deal with that (and reduce bias) in the context of ML/AI for resource allocation.

Students
Suhani Agrawal, Justin Huang, Ben Kreiswirth.

The Winkler Foundation

Irwin Winkler has established a Charitable foundation that gives money to (a) many worth causes and (b) our REU!

Adam Winkler is Irwin’s son who administers the foundation. He’s a law professor so he understands academia. (The other two sons are in the biz: a director and a writer.)
