AERON CHAIR - FULLY LOADED \$745! FREE Shipping!

► Herman Miller "AERON" Chair

Through advanced ergonomic design, the **aeron chair** sets a new standard to comfortable, healthful seating. Quite simply, it does what office seating has never before done. The Herman Miller **aeron chair** is designed to fit. Office chairs are traditionally designed to accommodate an average-sized person. Such chairs comfortably fit 50-60 percent of today's user population. The **aeron chair** comes in three **sizes**, small (A), medium (B) and large (C) - all with identical performance capabilities. The Pellicle suspension provides healthful support in all sitting postures, as the patented Pellicle material equitably distributes body weight on the seat and back. The material lets air pass through for comfort in any work environment. The distinctive appearance of the Herman Miller **aeron chair** is an expression of its unique capabilities and innovative materials.

Fully Loaded: Complete with two stage pneumatic tilt limiter and seat angle, padded adjustable arms and an adjustable lumbar support.

Three **sizes**: A, B or C.
