

Lab for Week09 Wednesday

There is a quiz to photocopy, please don't forget.

1. There is no handout, but have the students checkout the project on their CVS repository called 132Fall2016Lab10. They are supposed to fill in two methods, which are specified by the Javadoc contained in the class BinarySearchTree. There are public tests available for them to test their work. This exercise is not being submitted or graded.
2. Give the quiz. Allow 18 minutes for this one.
